RECEIVED

JUL 16 2001

KDHE
NORTHEAST DISTRICT

Attn: Jim Fischer

In reply to: Inspection of premises

- 1.) Flammable placards: we purchased (4) and have them on hand in shop
- 2.) Container marking: HAZARDOUS WASTE: Response: All placards are on drums (pictures included). Old barrels are to be removed by ESI as soon as possible. Fax enclosed from ESI confirming this. New barrels for waste have new placards with proper markings and are on new containment pallets.
- 3.) New barrels marked HAZARDOUS WASTE DATE STARTED 7-16-01
- 4.) Containers are removed from under the paint bench. (1) will remain and be used. It will remain closed. (Picture enclosed)
- 5.) Inspection folder made and we will make weekly inspections of outside storage area. Copy of inspection sheets enclosed.
- 6.) Kansas Generator Emergency Preparedness posted next to phone on wall. (Picture enclosed)
- 7.) Waste oil drum marked. (Picture enclosed). Will also be removed by ESI as soon as possible.

PAINT BOOTH FILTERS:

Paint booth filters were tested by M.D. Chemical & Testing, Inc., 7-11-01. Test results included. Filters tested showed 6.58 chromium. Filters were very dirty and needed changed. Probably worst test area available, as Jim Fischer and I did the sand.

RESPONSE: Changing filters, putting them in plastic bags. Waiting for response from Richard Bronaugh for disposal information. Faxed test results to his office. Mr. Bronaugh was out of the office. Talked to Steve in Richard's office 7-12-01 at 11:30 a.m. Told him what we were doing. He said that would be okay until Mr. Bronaugh returned. Faxed test results to Mr. Bronaugh's office 7-12-01. We also are double filtering our booth filters,

R00403349

RCRA RECORDS CENTER

moving back to front and discarding front filters every time. This may not be the proper way to handle the dirty filters. Please advise.

We also contacted PPI on 7-12-01 after talking to Rebecca which was very helpful.

Talked to Sheri Davis with PPI. They are coming to help us comply with laws. They are going to help train employees and myself in Hazardous Waste Kansas Generator requirements.

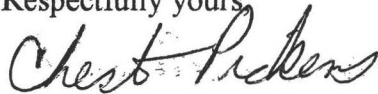

Had call in for Bob Roddy with the city of Kansas City Kansas. 7-12-01 Scott Craig returned my call from Water Waste Management of Kansas City Kansas. He is going to inspect and help in instructing the installation of a wash pit.

SAND TESTING:

Had sand sent to M.D. Chemical & Testing, Inc. 7-3-01 for TCLP testing.

RESPONSE: Test results attached . They tested fine.

Respectfully yours,

Just an FYI on what we have done in addition to the previous response to your inspection.

On July 25th, 2001 we had Mr. Green, an Industrial Pollution Prevention Specialist from Kansas State University come to our place of business. He went through Hazardous Waste Management Regulations with us and left handouts for us to give our employees and for us to go through a training program with them. He said if we wanted, he would come back and assist in that. At the time he was here we had a very large job in the works and could not pull the employees from that for training. We do plan to have that training session in the next couple of weeks.

Mr. Green was very helpful and we really would like to thank Rebecca in your office for recommending the services of PPI. He was very knowledgeable and eager to help. We will probably call him back to do the training so he can answer any questions the employees might have.

It is our goal to be compliant in whatever we do.

Respectfully yours,

Sharon Pickens
